ABOUT ME

BSIT graduate with practical experience in software development, IT support, and computer systems. Led the development of desktop, mobile, and Arduino-based solutions while providing technical support in a government office. Passionate about solving real-world problems through technology and eager to contribute in an ICT or entry-level software development role.

PROFESSIONAL EXPERIENCE

IT Intern

Department of the Interior and Local Government (DILG)

Dagami, Leyte | February 12, 2026 - May 18, 2026 (486 Hours)

- Supported daily IT operations through hardware and software troubleshooting.
- Installed and configured Windows, Microsoft Office, printers, and other office software.
- Assisted employees with technical concerns and user support.
- Maintained inventory records and prepared reports using Microsoft Excel.

PROJECTS

Project SIGLA - Sensor-based Inspection for Groundwater and Liquid Analysis
(Project Leader & Programmer)

Developed an Android-based groundwater monitoring system using Arduino Uno and water quality sensors for real-time analysis and early detection of contaminated water.

Library Inventory System

(Project Leader & Programmer)

Developed a desktop application using VB.NET and Microsoft SQL Server featuring inventory management, borrowing/returning of books, user login, and report generation.
